CAREER SUMMARY

Aspiring AI/ML Engineer with hands-on experience building Generative AI applications (RAG, LangChain, LLMs) and predictive ML models, backed by strong deployment skills using FastAPI, Streamlit, and Docker. Proficient in Python, SQL, Pandas, Scikit-learn, and TensorFlow.

TECHNICAL SKILLS

Programming & Databases: Python, SQL.
Generative AI: LLMs, RAG, Prompt Engineering, Embeddings, LangChain, Hugging Face, Ollama, FAISS, ChromaDB.
Machine Learning: Regression, Classification, Clustering, Feature Engineering, Scikit-learn, XGBoost, Random Forest, CatBoost.
Deep Learning & NLP: Neural Networks, Transformers, Sentence Transformers, TensorFlow, PyTorch, TF-IDF, Tokenization, Sentiment Analysis, NLTK.
Framework & Deployment: FastAPI, Streamlit, Pydantic, Docker, Git, GitHub.
Data Analytics: Pandas, NumPy, Matplotlib, Seaborn, Power BI, DAX.

PROJECTS

AI Career Intelligence Platform | Streamlit — Aug 2026 – Sep 2026
(Python, Streamlit, FastAPI, Pydantic, Scikit-learn, NLP, Sentence Transformers, Hugging Face, FAISS, Docker)
- Engineered an AI Career Intelligence Platform analyzing 2,000+ job postings using NLP-based skill extraction.
- Implemented semantic matching to recommend the top 5 career roles based on candidate skills.
- Identified 50+ in-demand AI/ML skills and ranked personalized skill gaps using job-market analysis.
- Created a **RAG-based resume-role matching pipeline using LangChain and Ollama**, combining sentence embeddings with LLM inference, and deployed using Streamlit, FastAPI, and Docker.

Job Market & Salary Trends Analysis Dashboard | GitHub — May 2025 – Jun 2025
(Power BI, DAX, Data Cleaning, Data Visualization.)
- Processed 14,200+ job postings using Power BI to visualize job, salary, skill, and location trends.
- Analyzed salary patterns across 50+ job titles and 15+ locations, generating actionable job-market insights.
- Built interactive dashboards and custom DAX KPIs, reducing manual reporting time by 40%.

Flipkart Product Pricing Strategy | GitHub — Apr 2025
(Python, Pandas, NumPy, Scikit-learn, Random Forest, Matplotlib, Seaborn, Jupyter Notebook)
- Developed a Random Forest regression model across 5,000+ products, **achieving R^2 = 0.61 and RMSE = Rs.26,402**.
- Automated an end-to-end ML pipeline for data cleaning, encoding, modeling, and evaluation.
- Improved pricing decision reliability by 15% through ML-based price prediction and analysis.

INTERNSHIPS EXPERIENCE

Code Clause — Jun 2023 – Jul 2023
Data Science Intern (Remote)
- Designed and executed a customer segmentation analysis using **K-Means clustering**, leveraging data from over 1 million mall visitors.
- Created interactive visualizations using Matplotlib and Seaborn, enabling a **10% boost in targeted marketing efficiency**.
- Performed efficient data preprocessing using Pandas and NumPy, **reducing data handling time by 30%**.

Response Infoway — May 2023 – Jul 2023
Application Developer Intern, Jaipur, India
- Engineered an object detection system using Python and OpenCV, **reducing detection latency by 15%**.
- Collaborated with cross-functional teams using Git for version control and efficient development workflows.
- Optimized SQL queries for application data retrieval and processing, **improving data handling efficiency by 10%**.

EDUCATION

Master of Computer Application (Artificial Intelligence & Data Science) — CGPA: 8.52 / 10.00
JECRC University, Jaipur, Rajasthan — Jul 2025 – Present

Bachelor of Computer Application — CGPA: 7.36 / 10.00
Poornima University, Jaipur, Rajasthan — Aug 2021 – Jul 2024
